

## APPLICATIONS

**Eni Betula 46** is a refrigerating compressor lubricant formulated with highly refined naphthenic base oils particularly recommended for industrial units and heat pump systems that operate with standard refrigerating fluids (R-12, R-22 and ammonia, SO<sub>2</sub> excluded).

## CUSTOMER ADVANTAGES

- Long operative life thanks to a very good oxidation resistance
- Compressor efficiency ensured by low tendency of lubricant to create carbon deposits
- Prevention of particles solidification inside the expensor circuit thanks to very low flocculation and pour points
